Science of Transformation

Healing of Love

We are working on the foundations for a future without war.

The Terra Nova School follows a new principle of peace activism – building a new information field. War, oppression and destruction originate from a global matrix of violence. The present world follows the morphogenetic field of war. We can only end the suffering if we step out of this field and build a new one – the morphogenetic field of peace. This is a fundamental system change from the old matrix of violence to a new matrix of trust and cooperation. For this purpose, the Terra Nova School works along the following guidelines and tasks:

- Realigning the human world with the higher order of life and creation
- Non-violent cooperation with all co-creatures
- Restoring nature and building “Water Retention Landscapes”
- Establishing decentralized subsistence economies
- Withdrawal from the oil industry through the development of autonomous energy systems
- Building functioning communities
- Ending the war between the genders and all sexual humiliation
- Truth in love and no deceit in partnerships
- No revenge – Grace instead of retribution

At the core of the global healing work is a new alliance of humans with all co-creatures. For peace to be achieved on the outside, it is crucial that it arises on the inside of human beings. Today, human beings have lost the ability to live together in peace. Fear, alienation and mistrust lead to irresolvable conflicts on all levels of society.

The deepest wound of humanity bleeds in the unresolved area of sexuality, love and partnership. This is no private issue between two lovers, but a central political issue of our times. We need to free love and sexuality from all forms of lying, deceit, fear and mistrust for there can be no peace on Earth as long as there is war in love. Terra Nova is a world in which free sexuality and partnership are no longer contradictory, but complementary. Together they form the essence of a new erotic peace culture. After thousands of years of suppression during the patriarchal era, the healing of love is probably the most revolutionary step in the current healing work. A new, humane culture is based on trust between the genders.

The future is always present. The caterpillar contains the information of the butterfly. Behind the global violence, the dream of a new Earth develops. The more the vision of Terra Nova is seen, studied, discussed, shared and concretely demonstrated in models, the more it will manifest on Earth.

How to participate?

1) Create a study group! Invite friends, colleagues and interested people to regularly meet and study the foundations for a humane future. You will receive a training package with study texts, lectures and videos once a month. The various groups will connect and exchange worldwide via our online platform.

2) Spread the word! Organize public events to share the vision of Terra Nova. Host readings, film screenings, political cafés, art events in your cities. Create something that inspires you!

3) Follow the ethics of truth and mutual support! Never lie to your partner! Respect every being, even the smallest! Whenever you flip the “inner switch” from fear to trust, you open a window into the new Earth.

All participants are annually invited to come together and meet personally in global gatherings, sharing our experiences and visions. The next meeting point will be in Tamera Peace Research Center in Portugal from July 31st – August 9th 2015.
