

TERRA NOVA SCHOOL NETWORK FOR A GLOBAL SYSTEM CHANGE

The development of humanity has reached a global dead-end from which we can no longer escape by conventional means. Only a new concept for human civilization can overcome the atrocities committed worldwide against human beings and nature. The Terra Nova School establishes an international cooperation for the development of a humane form of existence without fear and violence. It consists of local study groups and centers in various countries around the world.

The school serves the development of global consciousness, building community, healing love and creating a realistic utopia for the future. The Terra Nova School combines social, ecological and spiritual knowledge needed to manifest humanity's greatest dream – a world based on cooperation, solidarity and trust. We invite you to join and collaborate!

"Those who love peace must organize as effectively as those who love war."

--Martin Luther King Jr.

"The powers of life will prevail if the peace workers of all countries see a realistic utopia and if the worldwide indignation is connected to the vision of a new Earth.

If life wins there will be no losers."

--Dieter Duhm
